Miracle Method
SURFACE RESTORATION

Why Miracle Method is the first choice for quality refinishing of countertops, vanities, sinks, tile and bathtubs...

PROMPT SERVICE... we understand the need for timely make-readies and our commercial customers always receive special service and consideration.

BEST MATERIALS... we use the most technologically advanced coatings and procedures in the industry to produce superior durability and finishes on tile, fiberglass, porcelain and laminates.

MINIMAL DOWNTIME... time is money and our goal is to return units to service in 24 hours or less.

BEST VALUE... the combination of Miracle Method's superior quality, finish options and timely service results in the most cost-effective resurfacing available.

TRAINED PROFESSIONALS... licensed and insured, our technicians are the best trained in the industry.

Refinished kitchen countertops and resurfaced bathtubs can give your units the upgraded look you need for increased rents and faster rentals.

Miracle Method is the premium restoration process that works on all surfaces, including fiberglass, tile, porcelain, acrylic, laminate and cultured marble.

Our proprietary bonding process is safe and non-toxic—unlike dangerous etching acids used by most other refinishers. We'll have your units restored and ready to lease in just one day!

Like new kitchens, sparkling bathrooms and unblemished countertops make important first impressions on prospective tenants.

Complaints about slippery tubs can be eliminated with Miracle Method's Slip Resistant treatment. It is easy to clean, will not discolor or peel, can be color matched and installed in less than one hour.

"We have Miracle Method apply their Slip Resistant Surface in the tubs in all our properties. Our tenants appreciate it, and it has dramatically reduced slip and fall complaints."

Paragon Properties, Denver, CO

"Miracle Method has refinished just about everything here—tubs, tile, countertops, you name it. They're timely, professional and they're very good."
