Fiberglass Showers Repaired and Refinished to Look Like New in Just Two Days

Before

After

Miracle Method provides quality bathroom and kitchen surface solutions to multiple Brookdale Senior Living properties in Colorado and around the country.

The Problem

Many of the fiberglass showers in the independent living units had become dull and worn and didn't have the clean spotless look that exemplifies Brookdale Senior Living communities. Removal and replacement would be costly and difficult to accomplish in the company's seven-day unit turnaround goal for painting, installing new carpet, and upgrading the kitchen and bathroom surfaces.

The Miracle Method Solution

Brookdale asked for a smooth, clean white look so Miracle Method proposed repairing any chips or cracks then applying a gloss white coating. The new finish would actually be smoother than the original finish making it easier to clean. The process would require only two days and would not interfere with other work being done in the unit.

The Process

As living units become available, Miracle Method technicians use a two-step cleaning process on each fiberglass shower, make repairs, and refinish the prepped surface. The process takes two days from start to finish and easily fits into the company's seven-day turnaround plan.

The Result

The refinished fiberglass showers look like new, and residents are impressed with the clean, fresh appearance of the showers. Skyline uses Miracle Method on a regular basis to not only update fiberglass showers, but to also refinish kitchen countertops, bathroom vanities and tile walls to help maintain their facility as one of Colorado's premier senior living communities.
