Slip-Resistant Surface Solutions Minimize Slip-and-Fall Accident Risk for Extended Stay Hotel

The showers were refinished to like-new condition including the application of Miracle Method's durable Slip Resistant Surface (SRS).

The Problem

Extended Stay Hotel was seeking a cost-effective solution to improve the appearance and safety of American Disabilities Act (ADA)-compliant bathrooms. As part of the renovation, Hotel Management required a quick turnaround to maintain optimal hotel occupancy.

The Miracle Method Solution

Seeking an affordable and practical alternative to costly replacement, Hotel Management turned to Miracle Method for a solution. In order to make the bathrooms not only beautiful but safer for hotel guests, Miracle Method's Slip Resistant Surface (SRS) would be applied to high traffic surface areas during the refinishing process.

The Process

Miracle Method technicians started the refinishing process by thoroughly cleaning all of the bathroom surfaces including; vanities, bathtubs and showers. Chips and any surface damage was then repaired before applying a beautiful, new finish to the all the surfaces.

For added safety, Miracle Method technicians then applied a clear SRS finish to the bottom of each bathtub and shower basin. To meet the hotel's safety requirements and ensure a long-lasting solution for slip-and-fall protection, the amount of texturized grip was adjusted on the bonded SRS.

The Result

The refinishing project was completed with minimal downtime and disruption to hotel guests and staff. Miracle Method gave the outdated bathrooms a modern, new look, while providing an incredibly effective solution to reduce slip-and-fall liability. Impressed with the beautiful, durable and high-quality results achieved, Extended Stay has continued to utilize Miracle Method for additional work in over 44 states throughout the U.S.
